

DecorSlat Panel
Acoustic Panelling

DECORSLAT PANEL

Here at Decor, we take a standardised methodology and combine it with an ability to customise. Result? The ultimate in timber slatted ceilings and walls.

Decor will design the complete ceiling / wall with our in-house CAD technicians to ensure a fast and seamless installation experience for the Installing Contractor.

DecorSlat Panel is a pre-panelised system and is fully accessible, with any of its individual panels removable, giving easy access to items such as HVAC, Fan Coil Units, Lighting or Air Conditioning Units.

**Fits around anything.
Your day, your budget &
your customer's demands.**

WHY DECORSLAT PANEL?

Our DecorSlat Panel system is a fantastic all-round system that is suitable for virtually any application. We will work with you to ensure that we can deliver a product that fits your budget, works for your design and takes into account all the unique requirements for your project.

The Benefits

- Fast and Simple to install
- Up to Class A Acoustic Absorption
- Any profile size and timber species
- Complete design and setting out service - all included within our price
- Made to measure panels - No need for on-site fabrication or alterations
- Can be supplied as FSC® certified timber if required
- Available as both wall and ceiling panels
- No complicated fixing substrate required – uses industry standard framing systems
- Penetrations can be incorporated into the panels at factory stage
- Seamless Access Panels supplied where required
- UK manufacturer ensuring industry-leading response and manufacturing times
- Fast sample service available
- Any specification can be matched

including:

- Atriums
- Offices
- Schools / Colleges / Universities
- Cinema
- Classrooms
- Reception Areas
- Swimming Pools
- External Soffits
- Large Public Spaces

CASE STUDY FOR ROYAL OPERA HOUSE LONDON

Working with Swift Crafted Ltd, we supplied our DecorSlat Panels in American Black Walnut on the Royal Opera House refurbishment. This project involved many complex shapes and a significant amount of mechanical and electrical penetrations. Using our Decor methodology, we were able to accommodate these within the factory to ensure the panels arrived on site ready for installation. We also attended site several times during the installation to work with the Swift Crafted site team to overcome various challenges this complex project had.

Royal Opera House London

CASE STUDY FOR THE INTERCHANGE, CARDIFF

We worked closely with two contractors on this project, we supplied DecorSlat Panels to The Interchange in Cardiff. Celtic Contractors worked on the ceilings whilst Hazelwood Carpentry focused on the walls. Complex shaped ceilings and curved walls were all part of the project making it an exciting challenge to take on. We undertook extensive site surveys and completed many revisions of drawings to ensure the product fitted perfectly on site.

The Interchange

CASE STUDY FOR 95 CROMWELL ROAD

For this project we worked with FSC® Building services, supplying acoustic DecorSlat Panels in American Black Walnut for the walls within this amazing workspace. Various features had to be incorporated into the panels that made this project a unique challenge such as integrated lighting and creating panels to make a door invisible. This project was a great example of how adaptable the DecorSlat Panel system is and why it is the system of choice for installers.
