DecorCurve

"In life, as in art, the beautiful moves in curves."
Edward G. Bulwer-Lytton

DECOR Systems

Decor Systems panels can be employed for shaped wall and ceiling finishes without significant added effort. The panels in the Decor Systems range most commonly used for curved walls and ceilings are the DecorLini Planks and DecorPly/ DecorTrend Panels.

DECORLINI

- For radii above 10 meters, the DecorLini planks must be installed on the curved framing in a segmented layout.
- For smaller radii, Decor planks or panels can be made compliant by deeper relief grooving on the rear of the panel. Done this way, the panels can then be simply modified to suit

	Radius	Machining
DecorLini	>15 m >8 m	No special machining required Kerf Cut
DecorLini	> 10 m > 5 m	Installed in segments Kerf Cut
DecorLini	>8 m >1 m	Kerf Cut Customised in factory

DECORTREND AND DECORPLY PANELS:

For DecorTrend and DecorPly Panels please see the table attached

	Radius	Machining
DecorPly and Decor Trend	> 5 m > 1 m	Kerf Cut Customised in factory

For assistance with the following:

* Project specific details
* Creating a custom design
* Requesting a sample
* Writing up a specification
* Additional information on the DecorTile profiles
